SUMMARY

Backend-focused PHP/Laravel developer with experience across web development roles. Technical toolkit includes PHP, Laravel, MySQL, HTML and CSS with exposure to MVC-based application development and WordPress. Experienced in working on web-based projects, database management, and implementing application functionality. Familiar with Git-based version control and collaborative development workflows. Interested in building scalable, maintainable and user-friendly web solutions while continuously improving technical skills.

EXPERIENCE

LARAVEL DEVELOPER

Dec 2023 — Present

Intend Technologies Ltd. · Basbari, Kathmandu

- Develop and maintain scalable web application features using PHP, Laravel and MVC architecture.
- Design and manage database operations using MySQL.
- Develop RESTful APIs, implement backend business logic and integrate frontend components with server-side functionality.
- Debug application issues, optimize database queries and maintain code quality using Git/GitLab.

LARAVEL DEVELOPER

Mar 2023 — Oct 2023

Mero Network · Lazimpat, Kathmandu

- Developed and maintained backend modules using PHP, Laravel and MVC architecture.
- Implemented CRUD operations, database relationships and data management using MySQL.
- Developed API endpoints and handled data exchange between frontend and backend components.
- Performed debugging, application testing and version control using Git/GitLab.

LARAVEL DEVELOPER (INTERN)

Jan 2022 — Jun 2022

EKbana · Kupondole, Lalitpur

- Assisted in developing web application functionalities using PHP and Laravel.
- Worked with MySQL to perform database operations and implement CRUD functionality.
- Gained hands-on experience with MVC architecture, backend logic and REST API development.
- Assisted in debugging, testing and maintaining application modules while following development practices.

FRONT-END DEVELOPER (INTERN)

Nov 2020 — Feb 2021

Sansri Technologies · Naagpokhari, Kathmandu

- Developed responsive website layouts using HTML5 and CSS3.
- Implemented frontend components and translated design requirements into functional web interfaces.
- Integrated frontend interfaces with backend functionality and dynamic website content.
- Identified and resolved layout, styling and cross-browser compatibility issues.
